# Why the Unbanked are Still Left Behind

1.4 billion people  
– live without a bank,  
without ID, without a voice.

In centralized systems,  
their very existence goes unrecognized.

ENBANKED builds  
the first bridge  
to where the system cannot reach.

× 128

1.4 Billion  
Unbanked

# What is ENBANKED?

**ENBANKED**

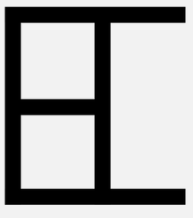

- "EN" represents connection, circle, harmony, coexistence; "BANKED" means having financial access
- A crypto-cash bridge allowing the unbanked to participate in economic activities
- Simple, secure, and human-centered remittance, receipt, and trust-building
- "EN" symbolizes a sense of belonging

# Access Beyond Identity

A crypto-to-cash bridge for the last mile.

With Worldcoin's proof of personhood, even those without nationality can receive and manage cash.

  
ENBANKED  
**ENBANKED**

×

  
Worldcoin

= **Access to life itself From**

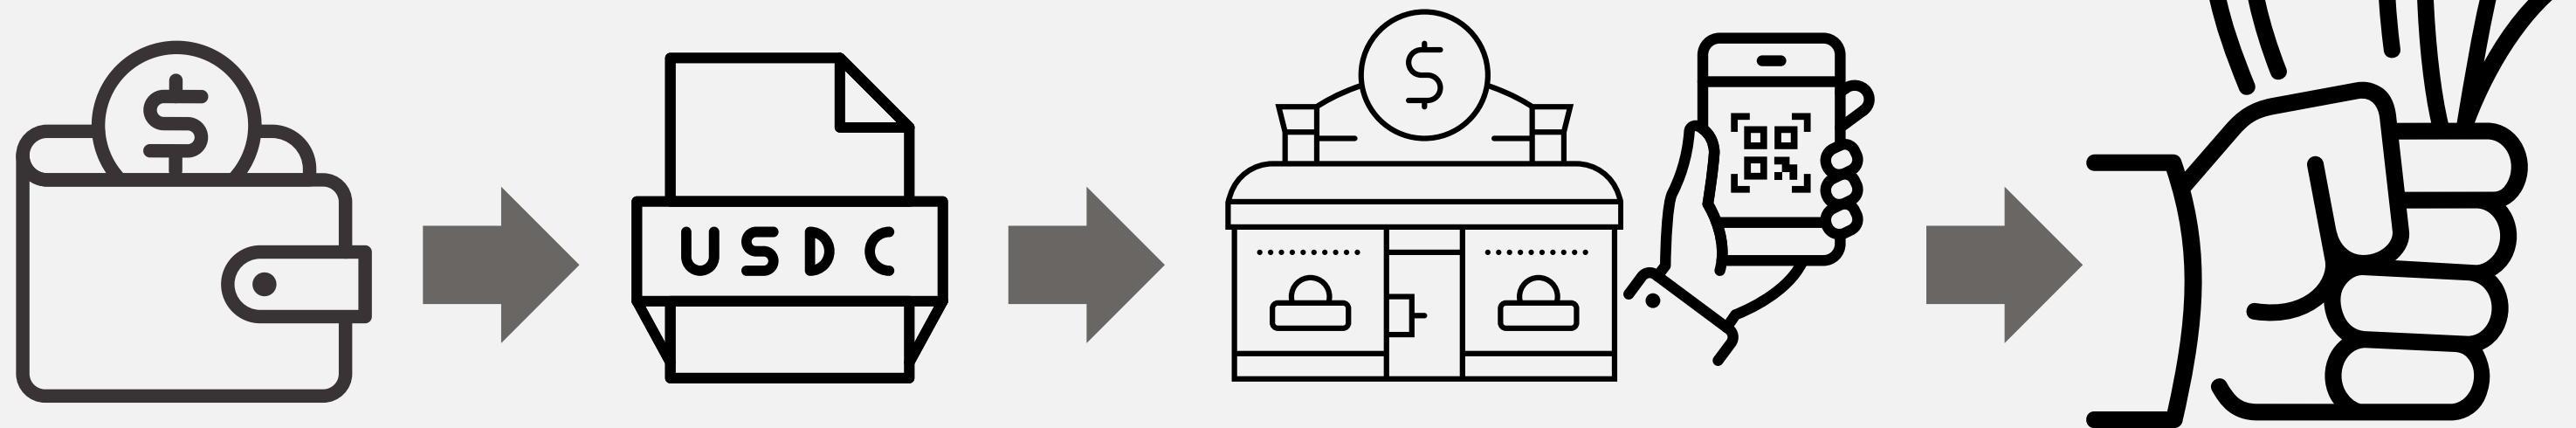

“No ID, no access”

“Humanity is enough.”

# Core Features of EMBANKED

- QR-based remittance and local cash withdrawals
- Identity verification via World ID without relying on centralized institutions
- Future integration with “Thank you” based peer-to-peer value exchange
- Voice and non-text UI support (planned)

How it works: Wallet → Receive Crypto → QR scan at shop → Local cash

# Why the Unbanked are Still Left Behind

1.4 billion people  
– live without a bank,  
without ID, without a voice.

=

× 128

ENBANKED builds  
the first bridge  
to where the system cannot reach.

There are 1.4 billion **unbanked**  
people in the world.  
That's the equivalent of 128  
Czech Republics.
