Why the Unbanked are Still Left Behind

1.4 billion people around the world
– live without a bank,
without ID, without a voice.

In centralized systems,
their very existence goes unrecognized.

$\times 128$

ENBANKED builds
the first bridge
to where the system cannot reach.

**1.4 Billion
Unbanked**

Why ENBANKED?

In March 2025, we visited the hills of Sangkhlaburi near the Thai-Myanmar border, where we met Mon and Karen families—living without nationality or ID.

What is ENBANKED?

“EN” = connection, circle, harmony, coexistence

“BANKED” = access to financial life → ENBANKED

ENBANKED is a bridge between crypto and cash-reaching where centralized systems cannot.

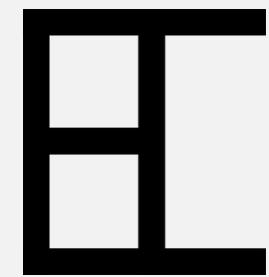

A simple, secure, and human-first platform for saving, sending, and belonging.

“EN” means more than connection—it’s a place to exist.

Access Beyond Identity

A crypto-to-cash bridge for the last mile.

With Worldcoin's proof of personhood, even those without nationality can receive and manage cash.

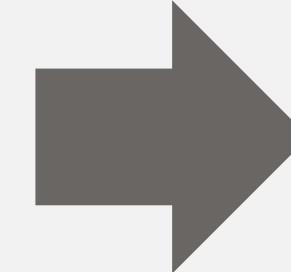

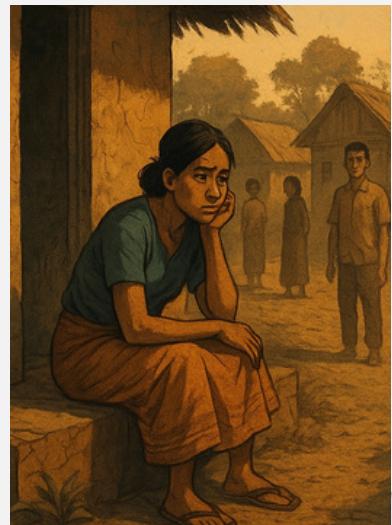

ENBANKED

Worldcoin

= Access to life itself From

Core Features of EMBANKED

- QR-based remittance & local cash withdrawal
- Identity verification with **World ID**
- No-fee, peer-to-peer international remittance
- Personal savings wallet secured by **World ID**

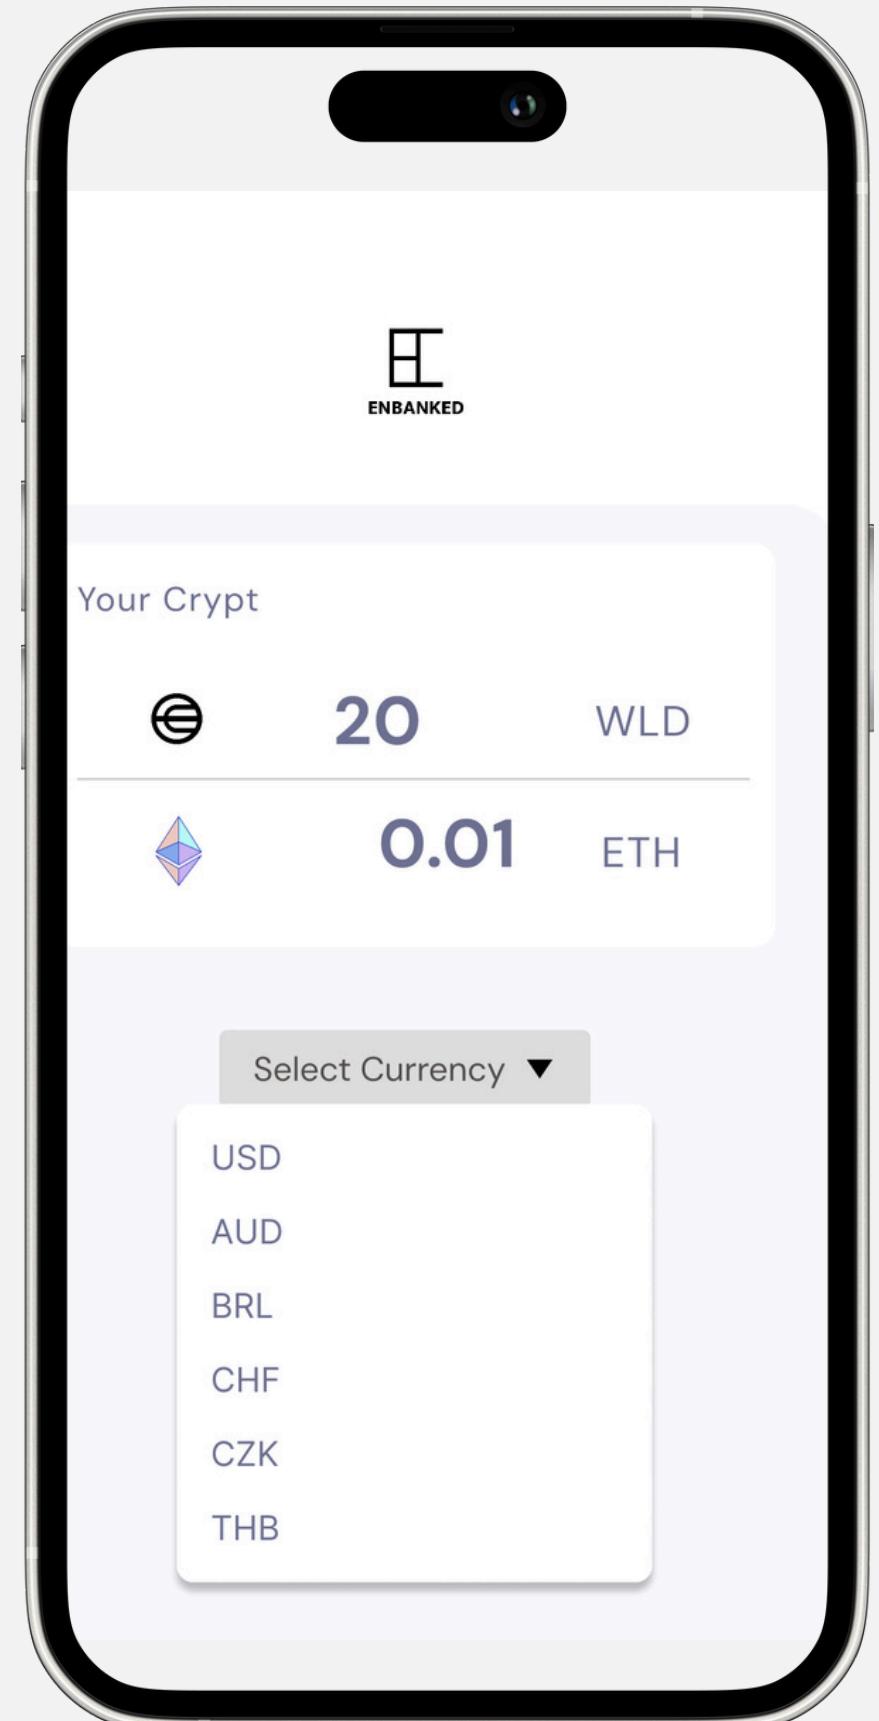

“No ID, no access”

“Humanity is enough.”

Inclusive UX for Real-World Needs

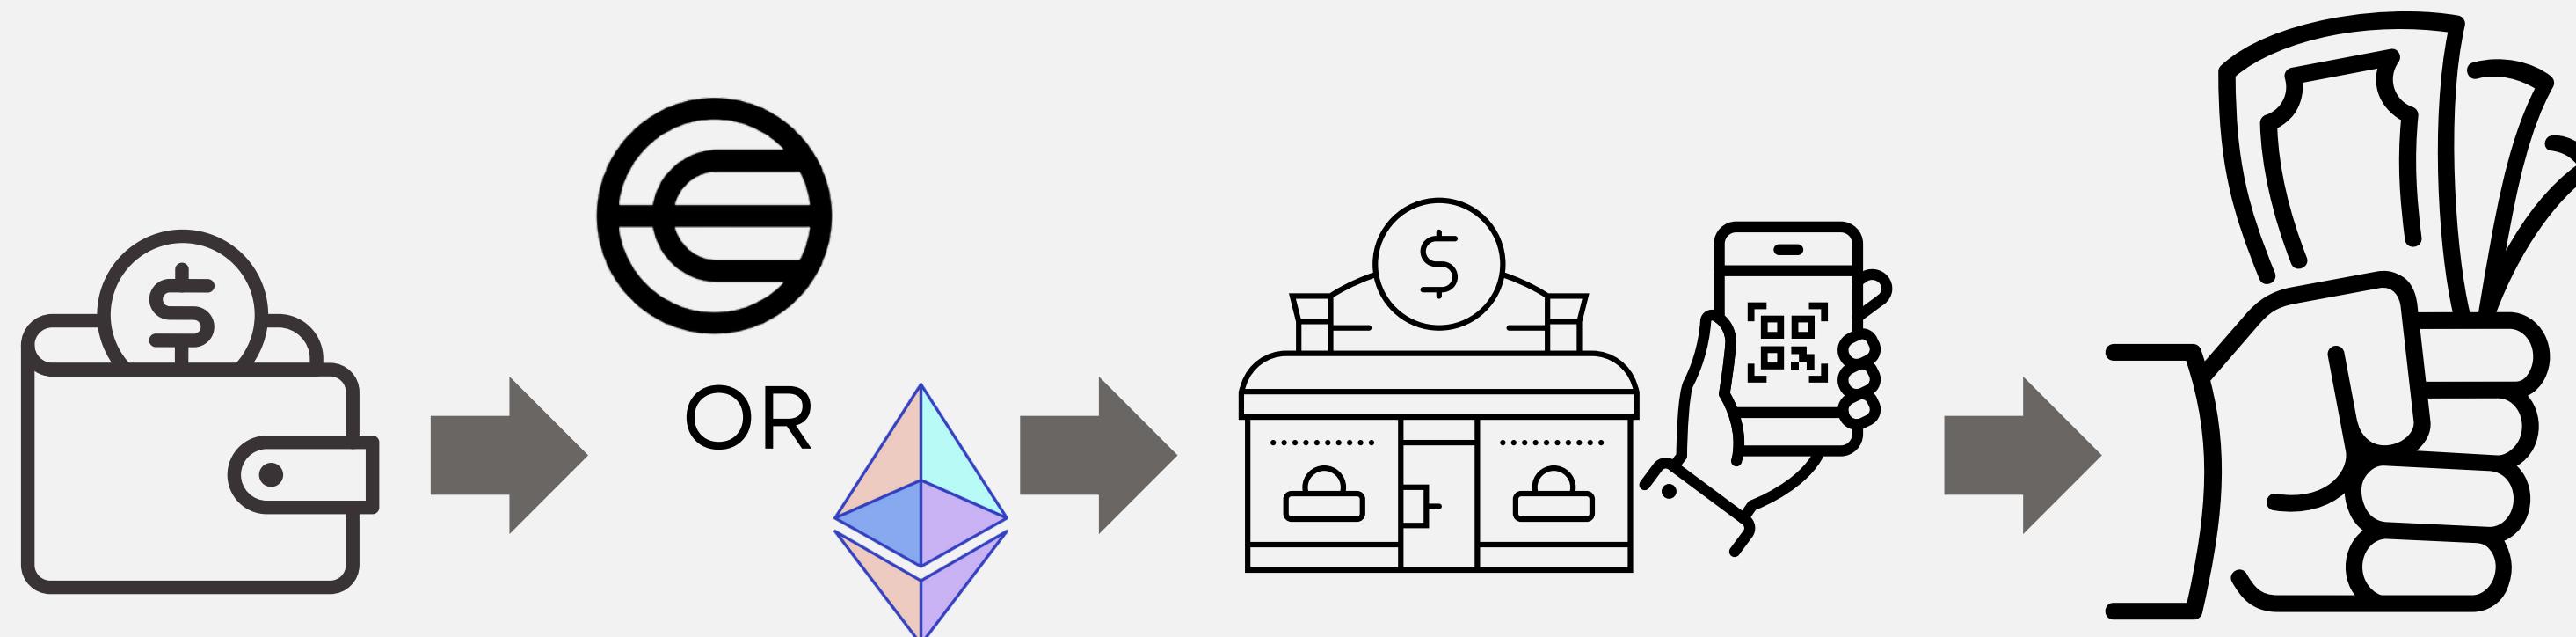

- Simple and intuitive UI
- Designed to create a sense of safety for all
- Single-screen, step-by-step experience
- “Thank you” reactions as visible emotional feedback

Tech Stack & Transaction Flow

- Integrated with World App (ID verification & MiniApp)
- Blocksout Explorer
- ZK technologies architecture

Full flow: select currency → select crypt remittance → QR generation → local cash withdrawal at participating stores

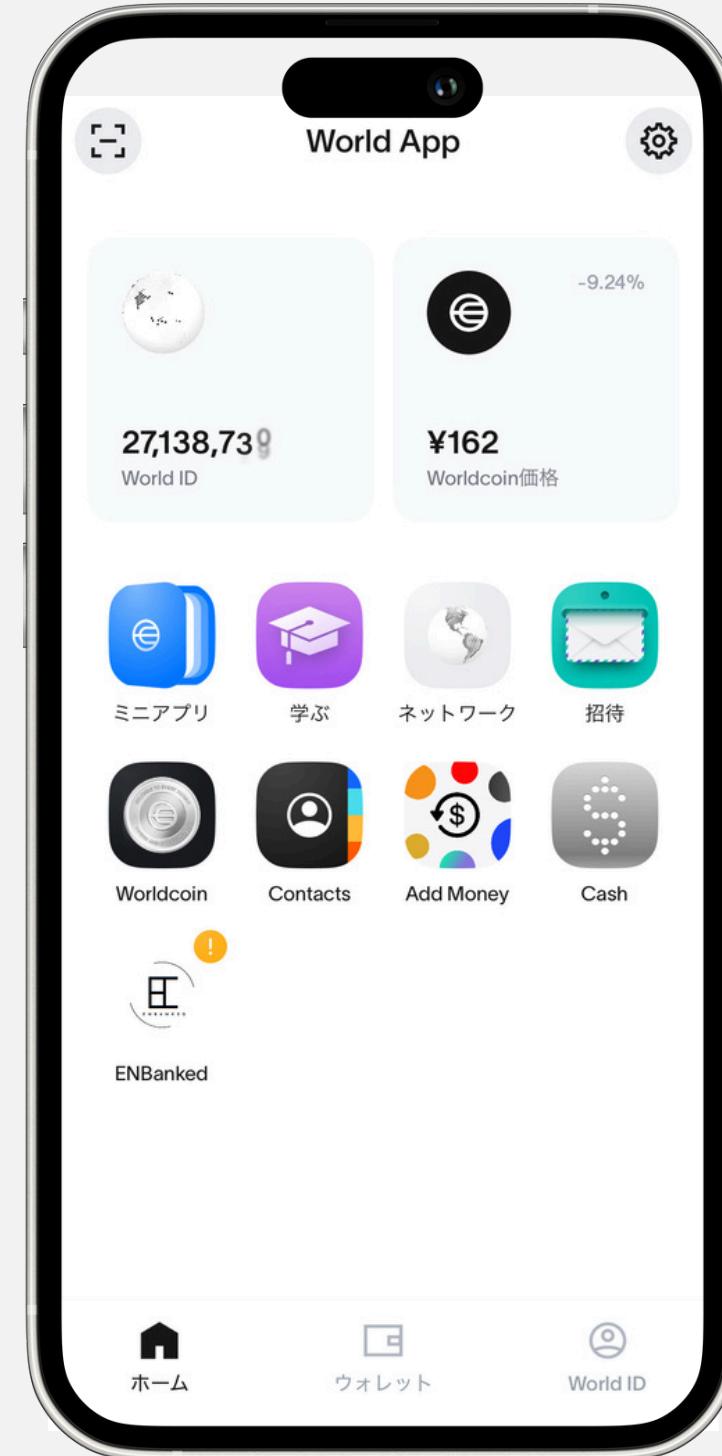

Real-World Use Cases

- Save money safely in a World ID-protected wallet
- Withdraw cash at local stores using a QR code
- Send money to family abroad without high fees or middlemen
- This may be the first time someone has an ID

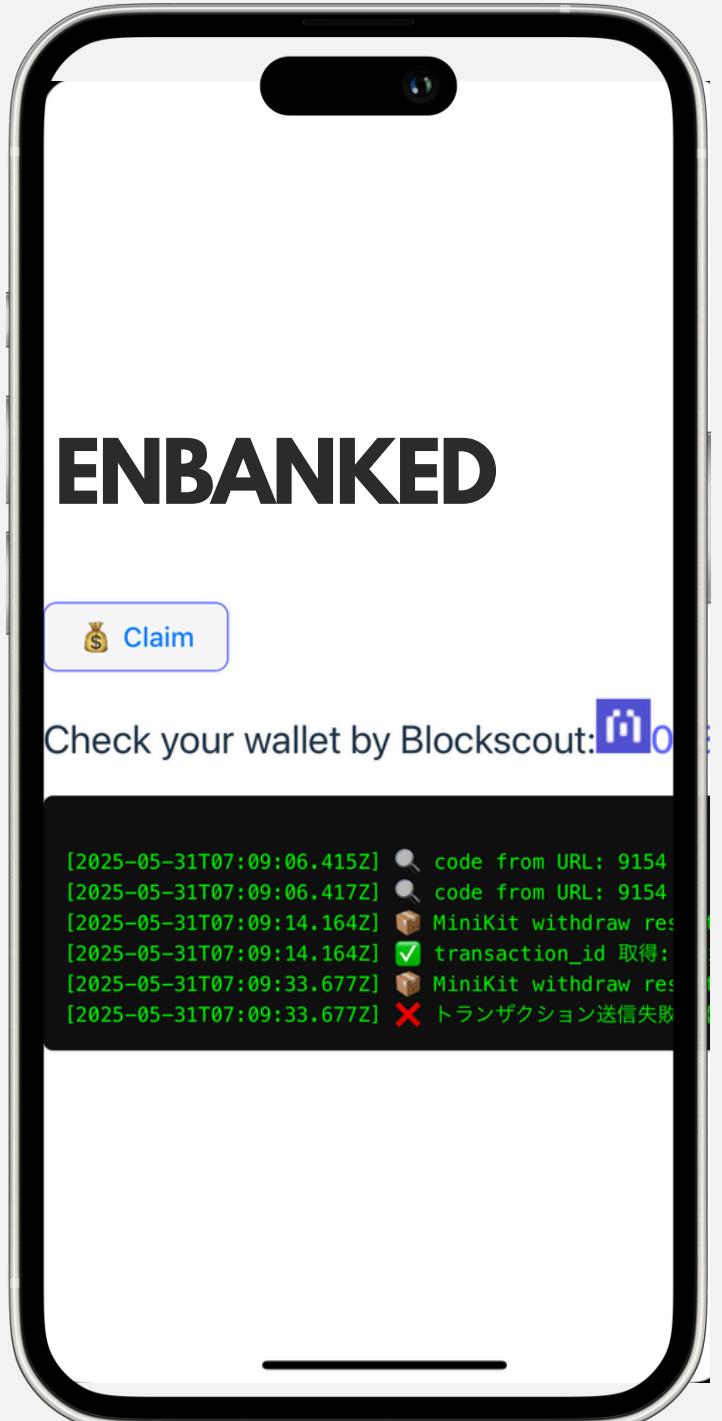

Protocol Integrations & Prize Eligibility

- World MiniApp 

- Blocksout (as primary explorer) 

- Autoscout SDK for real-time transaction visibility 

- ZK technologies 

ENBANKED: Rebuilding Economy through Connection

- ENBANKED is a light of belonging and hope for the unbanked
- Building an inclusive economy from where ‘EN’ – connection, and also “circle” / Japanese currency (yen) intersect

Let's ENBANKED the World 
It is a portal—from invisibility to humanity

Powered by Connection, Delivered with Trust

We don't just imagine the future—
we are already co-creating it on the ground,
across 30+ countries worldwide.

About maaaru

maaaru is a global network providing educational support and school reconstruction

across 30 countries and over 300 schools.

Through deep-rooted, community-based partnerships,
we're building bridges between children and their future.

Connecting with ENBANKED

Our local network brings ENBANKED to those who need it most.
From schools to corner shops –
they become crypto-to-cash points with just a QR code.

It's not charity. It's a new economy where everyone gains.
